PRESS RELEASE

Vantec, Incorporated, Webster City, Iowa, is excited and proud to announce that we will be adding an additional plant to our operations. It will be located in Falls City, NE. Falls City is located south of Omaha near I-29, with a population of approximately 5,000. Vantec is a custom injection molder, catering to many different Original Equipment Manufacturers located throughout the United States and abroad. Vantec anticipates starting operations in Falls City on, or around, November 1, 2008, in a 40,000 sq. ft. facility, with the ability to double in size as need arises. We plan to employ up to 25 people at the start with employment to grow from there.

Vantec would like to thank all of our customers, and our employees, for helping us grow the business and employ more people in Webster City, and, next, in Falls City. Vantec has grown by helping our customers achieve their goals, solving their problems, and are often asked how much more we can take on. We are excited to be able to employ more people and help take on more opportunities with our customers, and potential customers. We are honored that our customers are so loyal and have given us this opportunity. We know there are many other molders out there, with many of them closing their doors instead of opening new ones.

Vantec is locating in the southeast corner of Nebraska to help satisfy the need of a major customer in the area, and to take advantage of a readily available workforce. Falls City, and the State of Nebraska, has been very helpful throughout this process. Falls City will be a very nice community to grow with, and the state of Nebraska has a strong willingness to help businesses grow and remain in the state.

Vantec, Inc., a family business, is celebrating 25 years in business on December 1st 2008. It was started by Bev and Willie Van Wyhe with two employees and two machines. One of the first employees, James Wood, is still with the company today. Vantec currently employs over 200 people in a 145,000 sq. ft. facility, with 44 machines, at its Webster City location. We have been a 24/7 operation for over 15 of the 25 years we have been in business.

If you would like to learn more about Vantec, you may look us up on the web or call 515-832-3125 for more information. www.vantecinc.com
